

Department of Statistics
Colorado State University
Faculty Position Starting Fall 2016

The Department of Statistics at Colorado State University invites applications for a tenure track faculty position in biostatistics. The appointment will be at the Assistant Professor level with duties commencing August 2016. A doctoral degree in statistics, biostatistics, or a related field and a commitment to high-quality research in statistics and excellence in teaching are required.

The biostatistics position is part of a University cluster-hire aimed at addressing challenges at the nexus of air quality, climate and health. The successful candidate for this position will become a member of the Partnership for Air Quality, Climate, and Health (PACH, <https://vprnet.research.colostate.edu>) and will be expected to participate actively in this new multidisciplinary effort. This cluster-hire initiative seeks faculty with expertise in disciplines relevant to the mission of PACH to complement the University's considerable existing expertise in these areas. The successful applicant will have the opportunity to be a part of the Colorado School of Public Health (<http://www.ucdenver.edu/academics/colleges/PublicHealth/>), including the Graduate Degree Program in Public Health at Colorado State University (<http://www.publichealth.colostate.edu/>)

An application includes a cover letter, complete CV, graduate transcripts, teaching and research statements, and three letters of reference. The CV must address teaching experience. Application materials can be uploaded in PDF format at <http://jobs.colostate.edu/postings/18280>. Complete application instructions are available at that site.

Applications completed by **December 30, 2015** will receive full consideration, but applications will be accepted after this date until the position is filled. Applications of semifinalist candidates, including letters of reference, will be made available for review by the entire faculty of the Department of Statistics.

The department currently comprises 16 faculty and over 50 graduate students and has a network of faculty affiliates at nearby research agencies (National Center for Atmospheric Research, National Institute of Standards and Technology, and Centers for Disease Control and Prevention, among others). Our faculty members have a wide range of expertise and are involved in various interdisciplinary graduate training and research activities. Internal and external consulting activities of the department are supported through the Graybill Statistical Laboratory and the Center for Applied Statistical Expertise. Further information about the department and position is available on our web- page <http://www.stat.colostate.edu/>. Fort Collins, located one hour north of Denver in a beautiful location along the Front Range of the Rocky Mountains, offers abundant recreational and cultural opportunities.

The Department of Statistics is committed to diversity and inclusion and expects candidates to have the ability to advance the department's efforts in these areas. Colorado State University does not discriminate on the basis of race, age, color, religion, national origin or ancestry, sex, gender, disability, veteran status, genetic information, sexual orientation, or gender identity or expression. Colorado State University is an equal opportunity/equal access/affirmative action employer fully committed to achieving a diverse workforce and complies with all Federal and Colorado State laws, regulations, and executive orders regarding non-discrimination and affirmative action. The Office of Equal Opportunity is located in 101 Student Services. Colorado State University is committed to providing a safe and productive learning and living community. To achieve that goal, we conduct background investigations for all final candidates being considered for employment. Background checks may include, but are not limited to, criminal history, national sex offender search and motor vehicle history.
